Data according to Commission Regulation (EU) 327/2011 (EN 17166)

| | | Actual | Req. 2015 |
|---------------------------------------|---|--------|-----------|
| 01 Overall efficiency η _{es} | % | 38.8 | 33.1 |
| 02 Measurement category | A | | |
| 03 Efficiency category | | Static | |
| 04 Efficiency grade N | | 45.7 | 40 |
| 05 Variable speed drive | | No | |

| 09 Power consumption P _e | kW | 0.79 |
|--------------------------------------|-------|------|
| 09 Air flow q _v | m³/h | 6355 |
| 09 Pressure increase p _{fs} | Pa | 176 |
| 10 Speed (rpm) n | min-1 | 1325 |
| 11 Specific ratio* | | 1.00 |

Data obtained at optimum efficiency level.

 * Specific ratio = 1 + p_{fs} / 100 000 Pa

LU-205089

The efficiency values displayed for achieving conformity with the Ecodesign Regulation EU 327/2011 has been reached with defined air duct components (e.g. inlet rings). The dimensions must be requested from ebm-papst. If other air conduction geometries are used on the installation side, the ebm-papst evaluation loses its validity/the conformity must be confirmed again.

The product does not fall within the scope of Regulation (EU) 2019/1781 due to the exception specified in Article 2 (2a) (motors completely integrated into a product).

S4E500-ZL07-01

AC axial fan - AxiEco

with guard grille

Technical description

| Weight | 15.8 kg |
|--|--|
| Size | 500 mm |
| Motor size | 110 |
| Rotor surface | Painted black |
| Terminal box material | PP plastic |
| Impeller material | PP plastic, galvanized sheet-metal plate |
| Guard grille material | Steel, coated with black plastic (RAL 9005) |
| Number of blades | 5 |
| Airflow direction | V |
| Direction of rotation | Clockwise, viewed toward rotor |
| Degree of protection | IP54 |
| Insulation class | "F" |
| Moisture (F) / Environmental (H) protection class | H2 |
| Ambient temperature note | Occasional start-up at temperatures between -40°C and -25°C is permitted. For continuous operation at ambient temperatures below -25°C (such as refrigeration applications), use must be made of a fan design with special low-temperature bearings. |
| Max. permitted ambient temp. for motor (transport/storage) | + 80 °C |
| Min. permitted ambient temp. for motor (transport/storage) | - 40 °C |
| Installation position | Shaft horizontal or rotor on bottom; rotor on top on request |
| Condensation drainage holes | On rotor side |
| Mode | S1 |
| Motor bearing | Ball bearing |
| Touch current according to IEC 60990 (measuring circuit Fig. 4, TN system) | <= 3.5 mA |
| Electrical hookup | Terminal box; Capacitor integrated and connected |
| Motor protection | Thermal overload protector (TOP) with basic insulation |
| With cable | Axial |
| Protection class assignment | I; If a protective earth is connected by the customer This component for installation may have several local protection classes. This information relates to this component's basic design. The final protection class is based on the component's intended installation and connection. |
| Motor capacitor according to EN 60252-1 in safety protection class | S0 |
| Conformity with standards | EN 60034-1; CE |
| Approval | VDE; EAC |

Curves: Air performance 50 Hz

 $\rho = 1.15 \text{ kg/m}^3 \pm 2 \%$

Measurement: LU-205083-1

Air performance measured according to ISO 5801 installation category A. For detailed information on the measurement setup, contact ebm-papst. Intake sound level: Sound power level according to ISO 13347 / sound pressure level measured at 1 m distance from fan axis. The values given are valid under the specified measuring conditions and may vary due to conditions of installation. For deviations from the standard configuration, the parameters have to be checked on the installed unit.

Measured values

| | Wired | U | f | n | P _e | I | q_V | p _{fs} | q_V | p _{fs} |
